### **I b: Attainment of Programme outcomes and course outcomes by the institution.**

To ensure that the Program outcomes and Program specific outcomes are attained by the B. Pharm and M. Pharm students, the POs and PSOs must be mapped with various COs throughout the program curriculum. Each Program outcome is addressed by a set of courses in the program, thus increasing the likelihood of the outcome being achieved by the end of the program.

Course Outcomes (COs) are well defined and are prepared for each course by respective subject teacher. Each department has designed the Course Outcomes for the Courses it comprises and determined the type of PO to be addressed. The mapping is done at three levels : Low (1), Medium (2) and Strong (3).

Strength of Mapping of the CO to PO. : The mapping is done over all departments based on the number of hours of the classroom sessions devoted to a particular CO which addresses the given PO. Maximum correlation is achieved when the Subject is based on Problems or Practicals. If no classroom sessions then we considered the PO is not addressed and got the value zero.

For CO attainment Direct method is used completely based on the Syllabus (Course) for the Theory and Practicals. It is based on several Assessment Instruments like Sessional marks, Continuous Assessment, Attendance, Student teacher interaction and End semester exams for Theory subjects. Sessional marks, Continuous Assessment, Attendance, Journal, Viva marks and End semester exams for Practical subjects. 20% of internal marks and 80% of External marks are considered.

-2-

Target set was = 65% Internal, 60% External for all subjects of B. Pharm First to Final year and M. Pharm all Semesters. 3 levels of Attainment have been set.

- i) 60% students achieving marks more than the target value is considered Level 1,
- ii) 70% students achieving more than the target value is considered Level 2,
- iii) 80% students achieving more than the target value is considered Level 3.

If students achieved less than the target (65% for Internal and 60% for University exams) then the attainment is considered to be zero.

**Evaluation of PO attainment:** The final PO attainment is calculated by taking 80% of PO and PSO achievement from Direct method and 20% of PO and PSO achievement from Indirect method.

80% of direct attainment was taken for the PO attainment for B. Pharm and M. Pharm passing out students. The average of all the CO attainment value multiplied by Mapping value divided 3 (CO attainment X Mapping value / 3) for all subjects of eight semesters for B. Pharm and all four semesters for M. Pharm students.

20% of indirect attainment was taken considering the Exit survey taken from B. Pharm semester eight and M. Pharm semester four students.

The sum of the 80% direct attainment and 20% indirect attainment was done. Few co-curricular and extracurricular activities were undertaken by the students to improve the program outcome.
